

JAMES MULLANE

Computer Science & Economics Student | Full-Stack Developer

Auckland, New Zealand | +64223234859 | jamesmullane05@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

TECHNICAL SKILLS

Programming Languages: Python, Java, TypeScript, JavaScript, C#, SQL

Frontend: React, Next.js, Tailwind CSS

Backend & APIs: .NET, Flask, RESTful APIs, Prisma

Databases: Neon, SQLite, MongoDB, PostgreSQL

Cloud / DevOps / Tools: AWS, Vercel, Docker, Git/GitHub, CI/CD, Jest, Pandas, Excel

PROJECTS

Human Nutrition Unit Website

- **Technologies:** Next.js, TypeScript, React, Tailwind CSS, Payload CMS, Neon, PostgreSQL, AWS, Vercel, CI/CD
- Led 6 developers to build a user-facing website for a research institute as a capstone project.
- Implemented database migrations and automated CI/CD pipelines for deployment workflows.
- Built a branch-aware CLI tool that automatically selected isolated Neon databases based on Git branch prefixes, preventing local schema changes from affecting production or other developers.
- Built a Payload CMS admin system using globals, collections, and dynamic blocks to manage page content, research studies, case studies, and staff profiles.
- Developed an ORCID CSV import/export workflow that let staff clean article data, map inconsistent categories, and populate the research database.

Linux User Group Website (WDCC)

- **Technologies:** Prisma, TypeScript, RSS, Docker, Next.js, Jest
- Collaborated in an 11-person team to build a website for the University of Auckland Linux User Group.
- Built an RSS feed for club news posts, allowing users to subscribe through their preferred news readers instead of visiting the website.
- Built backend registration workflows integrating validation, parsing, and database persistence.

Label Printing Desktop Application

- **Technologies:** C#, .NET, WinForms, SQLite, RESTful API, Shopify API
- Connected Shopify order data to Brother B-PAC label printing software.
- Automated label generation and printing with a one-click workflow, reducing processing time by 80%.

EDUCATION

Bachelor of Science / Bachelor of Commerce Conjoint

Feb 2023 - Jun 2027

Majors: Computer Science and Economics

University of Auckland

WORK EXPERIENCE

Co-founder, Ecommerce Systems & Operations, Cosmoshop

Jul 2023 - Present

- Built and managed a Shopify ecommerce store across Shopify, Trade Me, Chrono24 and Facebook Marketplace supporting NZ\$15,000+ in monthly revenue.
- Created product data workflows for inventory, listings and sales channel management.
- Worked with distributors and customers to support day-to-day ecommerce operations.

Web Developer, Nuttall Henderson Jewellers

May 2023 - Jun 2023

- Designed and launched a Shopify storefront, migrating product pages and store content from WordPress to improve site usability and checkout experience.
- Migrated 200 products and store information from WordPress to Shopify.
